Use the companion at the level you need

Begin with the institutional question, then select the smallest sufficient resource set. The website provides a guided entry point; the canonical repository retains the complete editable and machine-readable source.

- **Understand the approach:** Read the printable companion and open the worked example aligned with the relevant book chapter.
- **Prepare an institutional decision:** Use the guided pathways to identify the core records required for the decision.
- **Use a form or workbook:** Open the consolidated bundles or the individual resource folder.
- **Study an applied example:** Review the synthetic scenario, assumptions, calculations, interpretation, and decision conditions.
- **Run an analysis:** Select a reproducible Python/Jupyter module by question, method, or related case.
- **Review the full source:** Use the chapter folders, process maps, and catalogs when detailed adaptation is required.

Important: worked examples and demonstration data are synthetic unless explicitly stated. Replace them with authorized, versioned local evidence before institutional use.
